EF43175	105" X 140"	175"	111 1/2" X 146 1/2"	77

Dimensions $\pm 1/4"$ - Sizes and specifications subject to change without notice.

Two materials for unique screen installation, Seamless, Washable! Call for custom sizes and aspect ratios.

Cinema Grey

Deeper black levels, improved color saturation, and sharper image. Absorbs unwanted ambient light while reflecting projected light back to the audience. Great for rooms with some ambient light. Great for 1080p video and higher resolutions.

Cinema White

Generally used in blacked-out rooms with dark walls. For accurate color output and bright images. Great 1080p video and higher resolutions.

Screen material attaches to frame by four rods slid through pockets on each side of the screen material. The rods attach to the screen frame and holds the screen material perfectly tensioned across the whole viewing surface. Unlike snaps or Velcro this tensioning method will last for a long time and hold tension evenly even if disassembled and reassembled. Unlike grommet and lace this tensioning system is fast and easy to assemble.

All screen materials are made in the USA. All screen treatments are applied in house by Severtson Corporation.

Enjoy a masterpiece in your home, office, or other locations with the workmanship and contour of the Severtson Legacy Series frame and Severtson screen materials.
